

Lab 2: Agile Backlog Creation & Sprint Simulation in Jira

Hospital Bed & ICU Allocation Dashboard
Prasanna Chidambar Marihalkar | PES1UG24CS684

EPICs and User Stories

Three Epics and eight linked User Stories were created in Jira from the project requirements.

SCRUM-6 - Bed Availability & Occupancy Monitoring

Provide up-to-date visibility of hospital bed and ICU availability so clinical and administrative users can make informed capacity decisions.

Key	User Story	Priority	Points	FR
SCRUM-9	View Current Bed & ICU Availability	High	3	FR-001
SCRUM-10	View Overall Bed Occupancy & Allocation Information	Medium	3	FR-005
SCRUM-11	See Updated Capacity After Bed Status Change	Medium	3	FR-003

SCRUM-7 - Patient Bed / ICU Allocation

Enable the triage nurse to allocate suitable capacity to a patient while preventing allocation to unavailable beds.

Key	User Story	Priority	Points	FR
SCRUM-12	Allocate Suitable Bed / ICU to Patient	High	5	FR-002
SCRUM-13	Verify Selected Bed Availability	High	3	FR-002
SCRUM-14	Show Alternatives When No Suitable Bed Is Available	High	5	FR-004

SCRUM-8 - Bed Status & Lifecycle Management

Maintain accurate bed status throughout allocation, transfer and release so that availability data remains trustworthy.

Key	User Story	Priority	Points	FR
SCRUM-15	Update Hospital Bed / ICU Status	High	3	FR-003
SCRUM-16	Release or Transfer a Bed	Medium	5	FR-003

Total backlog: 8 User Stories | **30 Story Points**

Sprint allocation

Sprint 1: SCRUM-12, SCRUM-9, SCRUM-13, SCRUM-15, SCRUM-11 = 17 points.

Sprint 2: SCRUM-14, SCRUM-10, SCRUM-16 = 13 points.
